ANNUAL REPORT 1968

and subsidiary companies

Directors' Report

To the Shareholders:

Your Directors are pleased to present the Company's consolidated financial statements for the year ended December 31, 1968, together with the Auditors' Report thereon.

SALES AND PROFITS:

Sales for the fiscal year 1968 show a slight increase which turned the trend. Net income before taxes amounted to \$241,000.00 which compares very favourably with a loss in the preceding year of

\$402,000.00, indicating improvement of \$643,000.00

Our Stove and Warm Air Furnace manufacturing facilities were amalgamated to our Sackville Plant. This change resulted in better utilization of all machinery and facilities, personnel was utilized to the best advantage, and general productivity increased.

Continued modernization program for the Rolling Mill was accomplished late 1968. This resulted in lower man hour content per ton. The full impact of this modernization will not be felt until the

entire program is completed.

During 1968 an Autoclave for the production of bonded aircraft assemblies was installed in our Aircraft Division. Included in this installation was a cleanroom, vacuum pump, additional air compressor capacity, as well as water treatment for the processing of aluminum parts which are to be bonded. In addition we installed a Verson Wheelon Press for the production of Aircraft details. While these facilities were installed by August, very little production was obtained during 1968 because it was necessary to qualify all of the equipment and receive approvals from prime Aircraft manufacturers with whom we have sub-contracts.

Expenditures on Capital Assets amounted to \$400,000.00 expended principally in the Steel and

Aircraft Divisions.

OUTLOOK FOR 1969:

Stove and Furnace Division: We have introduced a new line of Fawcett ranges which have been completely re-designed by our own personnel which according to sales meetings now being held, have favourable trade and customer acceptance. We have also introduced into our line Refrigerators which will form a package of Stove and Refrigerator for the modern kitchen, these have matching styling. We have added to our Sales personnel and expect to have complete nation-wide coverage. We are confident that these products will enable us to obtain a much greater share of the market. Our Warm Air Furnaces are widely accepted and are being re-engineered to meet customer requirements. At the present time production is falling short of customer demand.

The Rolling Mill with the completion of the modernization program will show better costing per ton of steel. The modernization includes new roughing stands, tilt tables, conveyors and handling equipment. New stands will be installed in the 11" mill. This will result in much greater production at considerable saving. At this time it looks as though construction will be brisk during this year which

will give greater demand for our production.

The Aircraft Division is now into production of bonded assemblies for major Aircraft manufacturers, and production will continually climb during the year. We have inquiries from all of the leading Aircraft manufacturers for the production of components. In addition we are still engaged in the repair and overhaul of components, this work is becoming less and less important.

We are pleased to report that the results of the operations for the year of our Subsidiary Company, Airco Products Limited, Vancouver, B. C., showed substantial growth. This growth is expected

to continue this year.

Your Directors feel that 1969 results will show very favourable increases. If the present trend continues we anticipate profits before Income Taxes of \$400,000.00.

OFFICERS AND EMPLOYEES:

Your Directors wish to record their appreciation to the officers and employees of the Company for their efforts and cooperation during the past year.

Respectfully submitted on behalf of the Board.

Meinan /
President.

Auditor's Report

The Shareholders, Enamel & Heating Products Limited.

We have examined the consolidated balance sheet of Enamel & Heating Products Limited and its subsidiaries as at December 31, 1968 and the consolidated statements of earnings, retained earnings and source and application of funds for the year then ended. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion these consolidated financial statements present fairly the financial position of the companies as at December 31, 1968 and the results of their operations and the source and application of their funds for the year then ended, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.
